

## TRAFFIC MAINTENANCE WORKER II

### Class Definition

Under supervision, performs a wide variety of skilled traffic safety maintenance tasks, including installation, maintenance, and removal of traffic control signs and markings on City streets for effective traffic control.

### Distinguishing Characteristics

Traffic Maintenance Worker II is the journey level class in the Traffic Maintenance Worker series. Incumbents perform the full range of skilled traffic maintenance tasks which include the installation, maintenance and removal of traffic control devices, such as traffic signs and markings, and operating and maintaining equipment. This class is distinguished from Traffic Maintenance Leadworker in that incumbents of the latter provide advanced working /lead direction to others.

### Typical Tasks

(This list is neither inclusive nor exclusive. Consequently, this information may not reflect Essential Functions for this class.)

Fabricates, assembles, installs, maintains and removes traffic control signs and markings.

Installs and maintains proper signing for construction and maintenance zones.

Places traffic control markings through the application of paints, plastics, and reflective markers.

Operates and maintains equipment required to accomplish the work in traffic control maintenance operations.

Removes traffic control markings by the processes of grinding, sandblasting, or hydroblasting.

Interprets drawings and sketches in preparation for measuring, tracking, and painting of pavement markings.

Creates simple diagrams and field sketches, and uses subdivision maps for placement of signs and pavement markings.

Performs related duties as required.

### Knowledge, Abilities, and Skills
